SUMMARY

Computer Science Engineering undergraduate at REVA University, graduating in 2027. I build web apps, developer tools, and AI-assisted projects, with a focus on learning by shipping and iterating. Currently strengthening DSA through C++ and seeking an entry-level software development role or internship.

EDUCATION

B.Tech in Computer Science Engineering | REVA University, Bangalore | CGPA: 7.848 / 10.0 | 2023 - 2027

Relevant Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, DBMS, Object-Oriented Programming, Artificial Intelligence

Class XII | Vivekananda Kendra Vidyalaya, Sri Vijayapuram | 79.2% || Class X | Vivekananda Kendra Vidyalaya, Sri Vijayapuram | 88.8%

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript, C, SQL

Frontend: React, HTML5, CSS3, Tailwind CSS, DOM API, Vite, responsive UI

Database Fundamentals: SQL, MySQL

AI / Developer Tooling: Ollama (local LLM integration), Agent Skills, Prompt Engineering, AI-assisted development workflows

Tools and Platforms: Git, GitHub, GitHub Actions, VS Code, Vercel, Netlify

CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, DBMS Fundamentals

Soft Skills: Problem Solving, Communication, Team Collaboration, Adaptability

SELECTED PROJECTS

AEIS - Autonomous AI Cyber Defense Platform | *React, TypeScript, FastAPI, Ollama (Llama 3.1)* | 2026

- Directed frontend development and integration for a two-person academic project, building the React/TypeScript dashboard and connecting its interfaces to existing FastAPI services for threat-detection, forensic, and response workflows.
- Integrated the dashboard with a local Ollama-powered AI assistant through backend endpoints, refining the frontend interaction and security-analysis workflow.

Think Before Code - Socratic AI Coaching System | *Agent Skills, Python, Prompt Engineering, GitHub Actions* | 2026

- Designed and iterated a suite of 11 portable Agent Skills for DSA and software-engineering practice, enforcing Socratic questioning, progressive hints, learner-verified reasoning, root-cause mistake logging, and specialist handoffs across debugging, testing, specification, code review, and interview practice.
- Built supporting infrastructure including deterministic skill routing, portable session Resume Packs, structural validators, a behavioral evaluation harness, unit tests, and GitHub Actions CI to validate skill packaging, routing, and model-behavior expectations.

FlowTrace - C Code Execution Visualizer | *React, JavaScript, Monaco Editor* | 2026

- Built and iterated on an AI-assisted C execution visualizer featuring a lexer/parser, AST-based execution engine, and step-by-step variable-state tracking for common C constructs.
- Integrated Monaco Editor and refined execution visualization, active-line tracking, error handling, and regression tests to create a debugger-like learning experience.

Folder Structure Visualizer - Nested Tree Generator | *JavaScript, DOM API* | 2025

- Built and iterated on an AI-assisted tool that parses indented text into a nested folder tree through direct DOM manipulation, with one-click ZIP scaffold generation and separated parsing, rendering, and export modules.

AptiVision - Aptitude Visual Learning Platform | *React, Vite, Tailwind CSS, Framer Motion, React Router* | 2026

- Designed and directed a React aptitude learning platform covering five modules, including Train Problems, Time and Work, Syllogisms, Venn Diagrams, and Percentages, with client-side routing and interactive step-by-step reasoning.
- Directed development of a Question Analyzer that applies pattern matching to route users to the relevant module, and integrated reusable reasoning components with local demo authentication and profile persistence.

CERTIFICATIONS

- Power BI Workshop - Mevi Technologies LLP, May 2025
- Game Development using Unity - 4-day Skill Development Program (SDP)

LANGUAGES & INTERESTS

Languages: English (Fluent), Hindi (Conversational)

Interests: Problem Solving, DSA, Developer Tools, Open Source, Web Development
