

FARHAAN KHAN

Bangalore, India

EDUCATION

B.Tech in Computer Science Engineering 2023 – 2027
REVA University, Bangalore CGPA: 7.888 / 10.0
Expected Graduation: 2027
Coursework: Data Structures & Algorithms, Design & Analysis of Algorithms, DBMS, OOP, Artificial Intelligence

Class XII 78.8% / 100
Vivekananda Kendra Vidyalaya, Sri Vijayapuram

Class X 88.8% / 100
Vivekananda Kendra Vidyalaya, Sri Vijayapuram

PROJECTS

FlowTrace – C Code Execution Visualizer *React · JavaScript · Monaco Editor*

- Developed a browser-based tool for visualizing C code execution step-by-step using JavaScript and React
- Implemented parsing and execution logic to track assignments, branches, and loop iterations with real-time variable state updates
- Integrated Monaco Editor for syntax highlighting and active-line tracking to simulate a debugger-like experience directly in the browser
- Supports core control structures including if/else conditions and loops, with a responsive interface for desktop and mobile devices

Folder Structure Visualizer *JavaScript · DOM API*

- Built an interactive tool that converts indented text into a visual nested folder structure rendered dynamically in the browser
- Added one-click ZIP scaffold generation for quickly creating downloadable project folder templates
- Structured parsing, rendering, and export functionality into modular components for easier maintenance and extension

PromptRouter *JavaScript · Chrome Extension*

- Developed a Chrome extension that analyzes user prompts and recommends suitable AI models based on task type and complexity
- Implemented a lightweight client-side classification workflow with no backend dependency or external API calls
- Designed the extension to operate entirely within the browser for faster performance and improved privacy

SUMMARY

Computer Science Engineering student with practical experience building full-stack web applications, developer utilities, and browser extensions using Python, JavaScript, and FastAPI. Solid grounding in Data Structures & Algorithms, Object-Oriented Programming, and relational database design. Focused on creating functional, responsive, and user-friendly browser-based tools.

SKILLS

Languages
Python · JavaScript (ES6+) · C · SQL

Frontend
React · HTML5 · CSS3 · Tailwind CSS · DOM API · Vite

Backend & APIs
FastAPI · REST API design · JSON processing

Databases
MySQL · relational schema design · query optimization

Tools
Git · GitHub · VS Code · Netlify

CS Fundamentals
Data Structures & Algorithms · OOP · DBMS

Soft Skills
Problem Solving · Communication · Team Collaboration · Adaptability
